

Electric Cord and Cable Reels
Featuring New
Commercial Cord Reels

HUBBELL

Wiring Device-Kellems

Hubbell Electric Cord and Cable Reels

Hubbell Wiring Device - Kellems now offers a complete line of electric cord, cable and static discharge reels for commercial, industrial and weatherproof applications. Hubbell reels eliminate unmanaged cords and cables which cause trip hazards or electric shock due to damaged wire insulation. These reels provide safe and

effective wire management for your facility or plant floor.

For **Safety, Durability and Performance** look to the industry **Leader... look to Hubbell.**

Weatherproof Cable Reels are made for the most abusive and demanding environments. These reels feature a solid steel construction, a 600V rating with SOW - A type cable and Type 4X enclosure rating. They are designed for use with 15 & 20 amp industrial products such as portable outlet boxes, Insulgrip® and Twist-Lock® devices and pendant push-button stations.

Industrial Cord Reels are built to provide safe, convenient power and lighting for demanding industrial applications and environments. The industrial reels are all steel construction, have a 300V rating with SJ type cord and can be ceiling, wall or bench mounted. They are available with fluorescent or incandescent hand lamps as well as a HBL5269C connector body and portable outlet box versions.

Commercial Cord Reels are designed for the less demanding requirements of commercial and light industrial environments. The Commercial reels feature steel construction and have a 125V rating with SJT type cord. These reels are UL Listed and provide power and lighting for all your needs.

Static Discharge Reels ground portable equipment operating in hazardous environments. When properly clamped to ground, the static discharge reel will prevent the build up of static electricity and reduce the chance of sparking which could cause an explosion.

Hubbell has developed a broad product line of cord reels to offer safe and efficient wire management solutions for all applications. Whatever your requirements, **Hubbell has the "reel" safety story.**

Weatherproof Cable Reels

Features

- Solid steel construction
- UL Type 4X enclosure rating
- Polyester baked on powder coat finish
- Ratchet lock
- Multi position roller guide
- Pivot base

Benefits

- Superior design for the most demanding environments.
- Watertight enclosure protects spring motor, junction box, slip ring assembly and cable entrance from hose-down and corrosion.
- Baked on finish provides tightly bonded shield to protect reel from abrasion or corrosion.
- Can be disengaged in field for constant tension applications, built in product flexibility.
- Adjustable guide with nylon rollers may be mounted in four different positions.
- Allows 340° rotation of reel. Increases range of cable to nearly any direction.

Industrial Cord Reels

Features

- Steel construction with yellow powder coat finish
- Multi-position guide arm
- Multi directional nylon rollers on guide arm
- 12 AWG 3 cond. cord standard on power reels
- Positive-latch mechanism
- Plug in power cord

Benefits

- Durable design and corrosion resistant.
- Mounting on the ceiling, wall, floor or bench.
- Easier pull and prolonged cord life.
- Greater current carrying capacity.
- Automatically maintains desired cord length.
- Requires no electrical wiring.

Commercial Cord Reels

Features

- Steel Construction
- Automatic shut off switch
- Molded on plug for power cord
- Compact size/flexible mounting
- Automatic ratchet lock

Benefits

- Durable design for commercial and general purpose applications.
- Available on fluorescent & incandescent versions. The automatic switch turns off power to the electrical attachment when the cord is fully retracted.
- Requires no electrical wiring.
- Takes up little room and can be ceiling, wall or bench mounted.
- Holds cord at desired length and provides easy, smooth retraction of cord.

Static Discharge Reels

Features

- Steel construction
- Compact design
- Massive grounding jaw clamp

Benefits

- High quality durable design.
- Takes up little space.
- Provides secure low resistance ground termination.
