- [Power Distribution](#)
- [Split Screen Pop Filter](#)
- [Rackmount Fan Panels](#)
- [EC-SPK36 Speaker Stands](#)
- [Door kit for 12 space rack](#)

## Split Screen Pop Filter - For Professional Voice Overs

The revolutionary design of the Split Screen Pop Filter ensures superior performance. The Split Screen Pop Filter:

- Utilizes A.P.D.T.™ to eliminate pops
- Outperforms traditional hoop style pop filters
- Eliminates resonant frequencies with 'Nparallel' surfaces

PF-SS

### What is A.P.D.T.™ ?

Air Pressure Dispersion Technology (A.P.D.T.™) has been used in the development of the revolutionary Split Screen Pop Filter to remove all unwanted explosive 'P' and 'B' consonants. A.P.D.T.™ works by providing the optimal amount of open space between two engineered screens. The first screen diffuses the air that causes explosive consonants. The open space between the screens disperses air pressure that can build in hoop style pop filters, while the second screen removes any remaining explosive consonants.

## Speaker Stands

The Edit Center Speaker Stands are optimized to accommodate near and field audio monitors in video and audio production and editing facilities. Featuring highmass all wood construction for resonance damping, these 3 high speaker stands include both carpet spikes and rubber feet to accommodate all floor surfaces. The unique dual cable channels separate audio and AC (when using powered monitors), and include an attractive wide molded cork Speaker platforms and bases measure 8 1/4" x 15 3/4", and are reversible to show your choice of either a graphite or cherry wood laminate surface. The elegant curved supports are finished in a durable black textured coating. Sold in pairs.

Includes self-adhesive foam pad to isolate speakers from top platforms

Includes self-adhesive foam pad to isolate speakers from top platforms and are available in dark cherry, honey maple and pepperstone finish

CLAW

## Quiet Fan Panels

- Low-noise fans factory installed
- Available in black brushed anodized, or black textured finish
- Available with 1 or 2 fans installed

Anodized Part #	Textured Part #	Racking Height	Free Air db Rating	# of Fans Installed
QFP-1	QTFP-1	5-1/4" (3 space)	< 30 dBA	one
QFP-2	QTFP-2	5-1/4" (3 space)	< 33 dBA	two

## NEW Designer Inspired Ultra Quiet Fan Panel

The smart, quiet, elegant way to keep the custom residential electrical system cool and satisfy the most discriminating clientele. The two rackspace Designer Inspired Ultra Quiet Fan Panel features a unique on-board processor that controls fan speed in direct proportion to equipment temperature resulting in quiet, reliable installations. The perfect thermal management solution for media rooms, screening rooms and other areas where people and electronics coexist, the Designer Inspired Ultra Quiet Fan Panel boasts the following features:

- 100 CFM cooling capacity
- Tasteful, subdued temperature and alert display provides instant system status
- On board digital processor varies fan speed based on equipment temperature, which is monitored via external sensor
- Notification system in the event of external sensor failure
- Local and remote notification of over temperature and fan failure to control system
- Available with a black brushed and anodized or silver brushed and anodized finish
