packing unit = 1

Setting Gauge

Protective caps/setting gauges

- The setting gauges are used to position coaxial jacks and pre-mating high-current plugs on male connectors DIN 41612 M if the pins are flow-soldered in PC boards.
- The gauges are held by clamping in connector body and protect the blade contacts.
- The gauges provide protection
 - during transport (if the male connectors have already been removed from the packaging),
 - during assembly,
 - against soiling,
 - during soldering.

Ordering information

Item		Part No.
Setting gauge for types	M	1393494-9
	M/2	1-1393494-0
	M/3	1 1393494-1

packing unit = 100
